** Engaging the final solution of LED display, making top grade of LED screen.*

** Making the world colorful.*

2.Specification

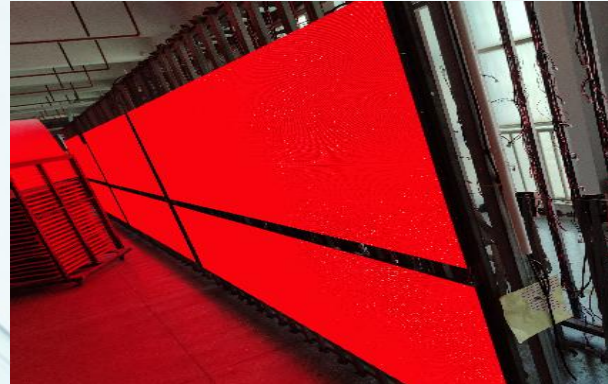

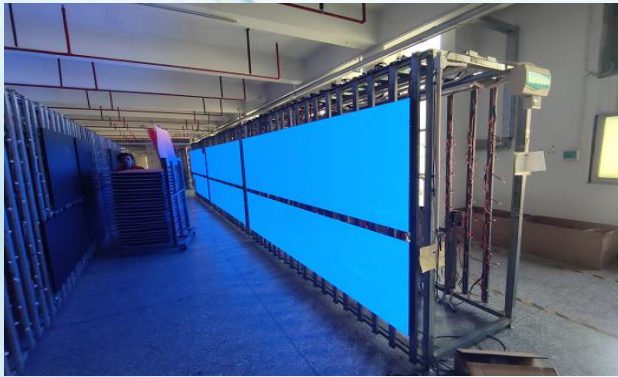

| Item | Parameter |
|--------------------------|--------------------------------------|
| Pixel Size | 2.5mm |
| LED Lamp | RGB SMD1515 |
| Scan Way | 1/32,Constant Current |
| LED Module Size | 320*160mm |
| LED Module Resolution | 128*64dots |
| Refresh Rate | 3840Hz |
| Brightness | 600~900cd per s.qm Adjustable |
| LED Module Current(Max.) | 6A |
| Power Consumption | Max.:600w/s.qm Avg.:300w/s.qm |
| Lifespan | 100000hrs |
| View Angle | Horizontal +/-140° ,Vertical +/-140° |
| Control System | Nova/Linsn/Colorlight |
| Maintenance | Front and Back Access |
| Display Color | 16.7M |

4. Workshop

5.LED Display for Aging Test

The aging test includes white balance aging(2 days) and video aging(1 day), totally 72hrs before packaging.

Process:

- 1.Check the LED module whether install correct totally.
- 2.Check whether there is a short circuit or nto.
- 3.Check whether the LED module is flat and neat.
- 4.Check whether the appearance is intact or not.
- 5.Use teh online LED control system to light up.

6.LED Project

Our Quality is your Savings!
